Letter of appreciation

I sincerely thank Dr. Sunil Keswani , MD of NBC airoli, for providing an opportunity to learn every minute details of cadaveric skin harvesting, storage, and processing of the same inside the skin bank until it becomes a major tool, saving lives of many burns patients. We had hands-on experience of all the major phases of cadaveric skin processing.

I thank Dr. Shilpa Karnik for her help and support in each step of training. I thank the NBC team of biotechnicians, Mr. Zeeshan, Mr. Viraj, Ms. Shruti, Ms. Natasha, Ms. Mouli for sharing their knowledge and skills.

Last but not least, I would sincerely thank Mr. Naveen, the PRO of NBC, who showed us the Flamingo park, and we were impressed by his good communication skills and kind nature.

We would definitely recommend NBC for many more who are interested in learning about skin banking.

Dr. Aravind Rao
Professor & Head.
